

NiceLabel Designers

Designer Express

The most affordable way to print labels from an Excel database

Low cost, Excel as a basic database.

- Wizards make professional label design quick and easy
- Connect to Excel data & design fewer labels
- Quicker, less errors and less maintenance
- Basic variable data capabilities

Designer Standard

The easiest way to connect labels with your existing database

Easier printing & print-to-file / printer export

- Easily design professional labels
- Connect to your existing OLE or ODBC DB
- Easy printing for your "operators"
- Concatenated variables – Expressions/linked fields

Designer Pro

The complete labeling package ranked #1

EasyForms, Logging, ActiveX & Print templates

- Every compliance labeling feature you need
- EasyForms for simple error-free printing
- Professional database, SQL, custom variables
- Passwords & print job logging
- Touchscreen printing support

PowerForms

Rapidly build custom labeling applications without programming

Reduce custom development costs

- Eliminate label misprints, duplicate serial numbers and data entry errors
- Increase productivity of labeling processes
- Integrate with production hardware, software
- Build applications for touchscreens or deploy to the web
