

Clamshell Card

The iDTRONIC Clamshell Card is a lower cost RFID card solution. Thanks to the very robust clamshell housing, the cards are very durable for a long time use.

The iDTRONIC Clamshell Card provides a white surface which can be printed with a serial number and customized logo.

The card can be supplied with the most common High and Low Frequency chipsets.

Applications:

- Access control
- Parking solution
- Campus ID
