

## **New from Zebra Technologies: Print from Apple® iPhone®, iPad™, and iPod touch® platforms**

Zebra is pleased to announce that users can now create applications that print to Zebra® mobile or stationary printers from Apple® iPhone®, iPad™, and iPod touch® mobile digital devices using the ZebraLink™ Multiplatform SDK.

Our innovative, auto-ID industry-first technology leverages the capabilities of Apple mobile digital devices in many new applications in markets such as retail and healthcare. Support for wireless LAN connectivity also enables connections with business networks\*.

The ZebraLink Smartphone Utility for iPhone®, iPad™ and iPod touch® devices is available for you and your customers to download to your Apple® devices from the Apple App Store<sup>SM</sup> at [www.zebra.com/zebralinkapp](http://www.zebra.com/zebralinkapp).

The new utility for Apple devices enables users to:

- Print a PDF or label template directly to a Zebra printer
- Retrieve and print files from the Web
- Take and print photos
- Connect to a printer's Web page
- Check printer status

### **Zebra's Professional Services Group is available to help**

To enable channel partners to quickly take full advantage of this new opportunity for revenue growth, Zebra Professional Services (part of Development Services Groups) can assist in the development and the integration of smartphone, device and terminal applications with Zebra printers. Contact [sdk@zebra.com](mailto:sdk@zebra.com) for more information.

### **More to Come**

As we add SDK support for more smartphone, terminal and PC operating systems, we'll be sending more announcements, watch out for the announcement on the support for Android™ applications.

For more information on the Zebra Multiplatform SDK contact your Zebra account manager.

\* Note that this new version for Apple devices does not support Bluetooth® or cable connectivity
