

URBAN FOREST LINE

LATSCHBACHER

- 1 Long hammer shaft - tags at a safe height
- 2 **FAST** application
- 3 Unbeatable **LOW PRICE**
- 4 Tag **"GROWS with the tree"**

ARBO TAG - THE ONLY IDENTIFICATION SYSTEM FOR STREET AND PARK TREES THAT GROWS WITH THE TREES

More and more municipal and private tree owners systematically collect their tree stock data. This serves to simplify the administration of tree stocks, identification of trees during tree control and upkeep measures as well as the creation of tree inventory plans.

The patented Arbo tag system is the only tree numbering system that expands as the trunk grows.

EQUIPMENT SET

- Fixing hammer
- Magazine feeding 40 individual tags
- Carry bag for 200 tags
- Closable carry bag for 200 fixing nails

Magazine and carry case only available as a complete set!

The practical portable magazine with a capacity of 240 number tags in combination with the magnetic nail seat in the specially developed Arbo hammer makes it possible to quickly apply the tag to the trunk. Depending upon planting density, between 120 and 200 Arbo tags can be attached per hour. Fixing heights of 2.5 to 2.8 m are possible using the special extended hammer shaft. The tags are attached so high on the trunk that unauthorized removal is nearly impossible.

Fig. TYPE 08

ARBO TAG BARCODE BLACK

- BLACK with white laser inscription
- 1st line: hole for nail
- 2nd line: numbering
- 3rd line: barcode 128 or
- 4th line: 2/5 individual text

Grows with the trunk

Arbo tags are manufactured as sequential numbers in large quantities which allows a comparatively low-price. Modern cadastral tree registers always have the possibility of recording two numbers per tree: one that is actually fastened to the tree, an Arbo tag, and an additional number that corresponds to the natural tree control sequence. The star shaped cut-out guarantees that the tag grows with the tree.

Fig. TYPE 08

ARBO TAG RESISTANT WHITE

- WHITE with black laser inscription
- 1st line: hole for nail
- 2nd line: numbering
- 3rd line: individual text
- 4th line: individual text

Grows with the trunk

Arbo Tags can be supplied in BARCODE BLACK and RESISTANT WHITE, with barcode or/and with text. The tags, imprinted with laser technology are durable and perfectly readable for many years.

- Fast application with one strike
- Outstanding durability
- Tag grows with the trunk
- Placement out of reach
- No danger of injury (fixing height 2.5 - 2.8 m)
